

# Living Environs

Keeping all the rules they have to and breaking all the ones they don't, Living Environs sets a new standard in landscape design

“THE COMPANY’S NEW 3D VISUALISATION SERVICE GIVES YOU THE PEACE OF MIND OF SEEING EXACTLY WHAT THE TEAM HAS IN STORE FOR YOUR UNIQUE OUTDOOR SPACE”

In Western Australia urban land doesn't come cheap. So Living Environs is committed to maximising the potential of every square metre in order to add as much value as possible to your outdoor area and surrounding amenity.

Living Environs is a groundbreaking landscape design and construction company that operates at the premium end of the residential and commercial markets.

It is their ability to innovate and add value that sees the demand for their services continue to grow.

The team approaches every project as a unique opportunity to go above and beyond today's conventional standards.

Often, it can be hard to visualise what the end result of your outdoor project will look like.

Fortunately, as a Living Environs client, you don't have to. The company's new 3D visualisation service gives you the peace of mind of seeing exactly what the team has in store for your unique outdoor space.

And sustainability isn't just a word to the dedicated team at Living Environs.

The team chooses local, recycled and sustainably sourced materials where possible, for flexible and environmentally responsible landscaping solutions that adapt over time for a long lifespan.

Be sure to stop by Living Environs' own slice of online real estate – the website – a true representation of their premium quality, attention to detail and ability to exceed expectations.

Day in, day out, Living Environs delivers high-end landscape architecture, landscape construction and project management services, with more than a twist of flair.
